I doubt it but out of an abundance of caution we should put it in. It can be very short. Do you want to take a stab?

Do you think Aquila would come up? Seems like that wouldn't be the place it would come up if the focus is on Brownfields.

Subject: HOT Issue Request - Lansing, MI and Brownfields

Hello Everyone,

Senior management later this month is participating in the dedication of a development built on a Brownfields site in Lansing, Mich., and will need hot issue support. Please send items about Michigan redevelopments, reuse sites and Brownfields, especially in central Michigan but include the most interesting ones statewide. A general item with facts and figures about Michigan Brownfields and EPA-aided redevelopments would be most welcome, I suspect. If there is a hot issue about anything in the Lansing area throw that in. State and federal elected officials will be attending the event. **I think we need to cover our leadership with the very latest update on Flint water in case they're asked about it.** The MDEQ commissioner will be there too. If you have a hot issue between EPA and MDEQ, better include that.

Send your issues to, **Andy Tschampa**, by **COB Wednesday, May 9**.

I'll attach the last two Michigan issues submitted as well as the latest hot issue template.

Scott
